## About me

I began my career in 2020 as a freelance developer, gaining hands-on experience with technologies such as React, Node, and React Native. Over the years, I have contributed to and led diverse projects, solidifying my expertise as a Fullstack Developer. I specialize in building scalable, high-performance applications using Node.js, React, Vue, Next.js, React Native, and TypeScript. My journey has allowed me to develop a strong foundation in both frontend and backend technologies, while also honing my problem-solving and collaboration skills.

## Technical Skills

JavaScript, TypeScript, React, Node.js, Express, MongoDB, PostgreSQL, Nextjs, Docker, AWS, Git

## Work Experience

### Frontend Developer

#### Atento

January 2025 - March 2025

At Atento, I am responsible for working with Next.js on various products, such as Advanced Insights, which is essentially a system that uses artificial intelligence for companies with customer service departments.

- I built multi-language features and a report quality flow.
- I converted a large portion of the client components into server components, achieving a 40% performance boost.
- I implemented an AI-powered chat that allows the user to select an audio file and engage in a conversation or ask questions about that audio.

### Senior Software Engineer

#### Breaker19

August 2024 - November 2024

Breaker19 is an efficient oilfield trucking & hotshot marketplace. I worked on the refactoring and maintenance of the driver and buyer apps using React Native, Expo, and Swi. I didn't limit myself to mobile development, but also contributed to the backend using Laravel and PostgreSQL.

- Created and maintained the web portal for buyers and drivers.
- Work on location features and language features.
- Refactor the Database and API to get more performance.

### Software Engineer

#### Fetchly Labs - Software House

August 2022 - June 2024

Responsible for creating web and mobile systems using React, React Native, Node, Nextjs, Angular, and Vue. During my time at Fetchly, I independently developed systems when necessary and assisted other teams by leading and supporting backend and frontend developers, like:

- Ecommerces.
- Financials sowares (Home Loan Gurus).
- Hospital Applications.

### Fullstack Web Developer

#### Noclaf Tech - Software House

March 2022 - July 2022

During my time at Noclaf, I worked as a full-stack developer using React, Angular, Firebase, Node, and GraphQL. I participated in the development of:

- Management systems (Spendfy).
- Ecommerces.
- Educational Applications.
- 

### Frontend Developer

#### Port Louis

December 2021 - February 2022

During my time at Port Louis, I was responsible for maintaining a legal system using Vue.js, Node, and MySQL.

- I wrote unit tests with Jest.
- Fixed bugs.
- Created new features.

## Freelance Developer

### Just myself

June 2020 - August 2023

I began my career developing websites and mobile applications as a freelancer in my city using Next.js, React, Node, React Native, and MySQL. I developed:

- E-commerces.
- Landing pages.
- Mobile apps.
- Blogs
